DETAILED ACTION

Terminal Disclaimer

1. The terminal disclaimer filed on May 18, 2009 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of any patent issuing on US Patent application 10/575,468 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Thus, nonstatutory obviousness-type double patenting as being unpatentable over claims 1 and 4 - 12 of copending Application No. 10/575,468 (see Office action mailed on December 16, 2008) has been overcome.

Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance:

US Patent 5,412,067 to Shinoda as a most close prior art of record, discloses similar process of preparation polyester from cyclic ester, wherein proton concentration from all sources, including water, is minimized, in order to obtain polyester with specific molecular weight, but fails to disclosed or suggested **adding** molecular weight control agent consisting of water in specific amount as it required by amended Claim 1. US Patent 5,342,918 to Howelton provide teaching that water can be used as initiator for ring opening polymerization of cyclic ester, but fails to teach specific amount of molecular weight control agent consisting of water added to polymerization system as it required by language of independent Claims 1 and 24. Therefore, claimed subject

Art Unit: 1796

mater of independent Claims 1 and 24 and all dependent claims, allowable over prior art of record.

Conclusion

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
